

How to Write Vietnamese using Unicode keyboard

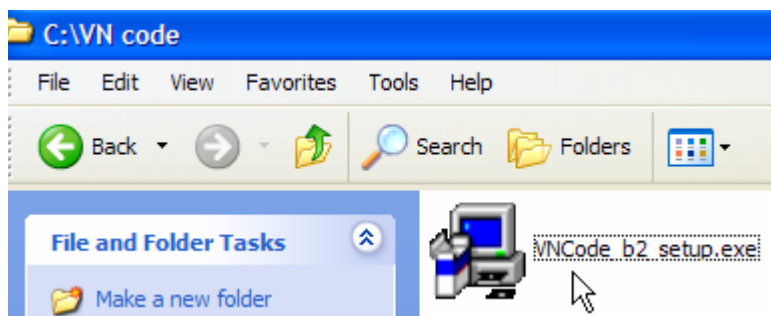

(Chỉ dẫn: Làm sao viết Email bằng Việt Ngữ)

1- Download: [VNcode.zip](#) (Vietnamese Unicode keyboard)

2 - Unzip [VNcode.zip](#) into a C:\ folder

3 – Double click to install [VNCode_b2_setup.exe](#)

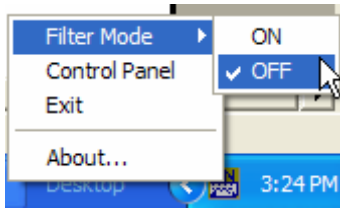

4 –Go to [Start > All Programs > Launch "VNCode 1.0"](#)

5 – you should see an icon at the [lower right corner](#) at the bottom as follows:

6 – point to the icon and [right-click](#) on the mouse:

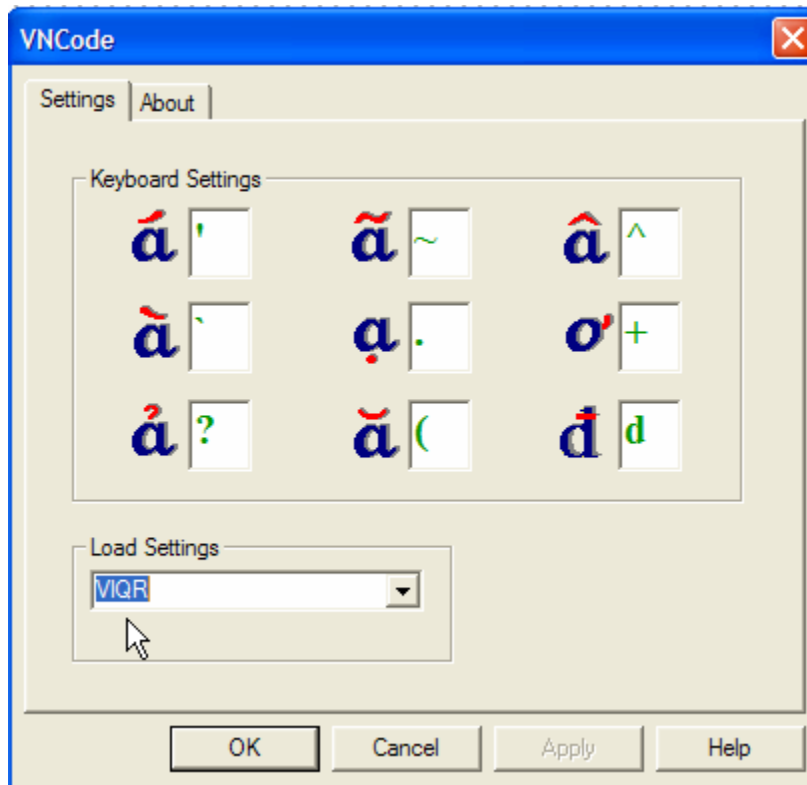

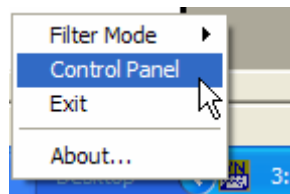

>>>> Filter Mode **ON** > Vietnamese mode **enabled** > **VN**

>>>> Filter Mode **OFF** > Vietnamese mode **disabled** > **VN**

7- for instructions for of keyboard layout, click on *Control Panel*:

8 - Make sure that you select **VIQR** then click OK.

9 – Turn on the Filter Mode to **ON** and you are ready to type.

Per example:

No Unicode > **To^i ddi a(n pho+? Ba('c ta.i qua'n Nha` To^i**

With Unicode > **Tôi đi ăn phở Bắc tại quán Nhà Tôi**
